10 AI DO'S

- Set Policies**
Establish guidelines for how to best use AI
- Provide Training**
Train employees on how to use AI tools
- Start Small**
Start simple, before scaling up AI use
- Be Specific**
Use detailed prompts for precise results
- Prioritize Security**
Implement robust data protections
- Combine with Expertise**
Verify output with human oversight
- Embrace Efficiency**
Automate repetitive tasks with AI
- Leverage Insights**
Make informed decisions with AI data
- Integrate**
Integrate AI with systems where possible
- Stay Informed**
Stay updated on AI advancements

10 AI DON'TS

- Rush Adoption**
Research and plan before implementation
- Neglect Training**
Provide proper guidance and support
- Over-Rely**
Don't rely solely on AI for critical decisions
- Skip Testing**
Test AI tools thoroughly before deploying
- Neglect Security**
Don't overlook AI's security needs
- Ignore Bias**
Review content and correct AI biases
- Disregard Compliance**
Align AI usage with regulations and laws
- Ignore Feedback**
Address all AI implementation concerns
- Overshare**
Don't use sensitive data in public AI tools
- Overcomplicate**
Keep interactions simple and user-friendly
