

MANAGED IT SERVICES PROVIDER CHECKLIST ASSESSMENT QUIZ

Is It Time To Switch To Managed IT Services?

USE THIS CHECKLIST TO QUICKLY EVALUATE YOUR CURRENT IT SITUATION AND DECIDE IF PARTNERING WITH A MANAGED IT SERVICES PROVIDER IS RIGHT FOR YOUR BUSINESS.

TECHNOLOGY & SUPPORT ASSESSMENT

1. We've experienced unplanned downtime or system outages in the last 6 months
- Our team often waits for IT issues to be resolved (slow response or unclear support)
- We rely on a break-fix model or sporadic support, not a consistent IT partner
- We don't have a clear IT strategy or roadmap aligned with our business goals
- Our internal IT staff (if any) is overwhelmed or lacks specific expertise
- We're unsure how secure our data, devices, or remote workers really are

SCALABILITY & FUTURE GROWTH

2. IT issues are slowing down our growth or blocking new initiatives
- We're unsure how to scale our infrastructure as we grow
- We're planning an expansion, cloud migration, or major software upgrade
- We want better data, reporting, and planning tools for our business
- We want a predictable monthly IT cost instead of surprise bills

CYBERSECURITY & RISK MANAGEMENT

3. We don't have 24/7 monitoring for cyber threats or system failures
- Backups are not regularly tested or reviewed
- Our company lacks employee security awareness training
- We haven't had a recent cybersecurity risk assessment
- We aren't confident we're in compliance with current industry regulations
